

Elementary Program Information

Kindergarten-2nd Grade

Additional grades added each school year.

English Immersion

Our teachers have native English fluency and create an environment where your child is genuinely immersed in the English language

Christian Values

The foundation of our education is based on guiding children to understand and develop Biblical values through Bible classes, chapels, and daily integration of Christian values.

Innovative Curriculum

Our non-traditional education style has been carefully developed to reach each child on his level, engaging him in the learning process by creating opportunities to explore and discover the world, and develop higher order thinking and processing skills for success in the future.

Small Class Sizes

Our small class sizes allow for intentional and individualized learning, where each child is valued and respected, and where children develop into active and responsible learners. We foster a loving, safe, and positive environment and community amongst our teachers and students, as well as their families.

MINEDUC Approved

All aspects of our program meet or surpass all government standards and are approved by the Ecuadorian Ministry of Education

Our Methodology

Our highly trained and experienced teachers use a variety of teaching styles and strategies to provide an exceptional education that equips and empowers each child for success.

Learning Centers

Exploration with hands-on activities to prompt inquiry, develop deeper understandings, and encourage a love for learning.

English Immersion

Our program is 100% in English, immersing students in a native English environment. We work with students on their individual English level to develop fluency, comprehension, and vocabulary in the English language.

Small Group Learning

We meet the needs of each individual by providing small group instruction tailored to each child's abilities, so that every student is confident and successful.
